PREFACE.

THIS volume contains six parts which have already been issued separately, and are now presented collectively, accompanied by a General Index covering the subjects treated.

The figures should be read in conjunction with the "Official Year Book of New South Wales."

Part "Mining" has been omitted from this issue, but it will be included, in amended form, in the next volume.

The Government Statistician wishes to express his thanks to the Commonwealth Statistician, to the responsible officers of the various State and Commonwealth Departments, and to others who have supplied all desired information, often at considerable trouble.

Bureau of Statistics and Economics,
Sydney, July, 1953.

*The following inter-fund items, included in expenses of the Consolidated Revenue Fund and revenue of the Railways, and the Trams and Omnibuses, are omitted from the column "Total Budget" to avoid duplication:—(a) Contribution towards losses on developmental railways, £800,000 yearly, (b) part of Commonwealth grant for revenue losses in Coal Strike—to Railways £3,000,000, Trams and Buses £200,000 in 1949-50. † Includes exceptional items (*a*) *Revenue* £3,888,772 and (*b*) *Sinking Fund* £3,840,000 associated with special repayment of Deficiency Treasury Bills. ‡ Amounts below omit net payments in respect of public debt charges attributable to the Business Undertakings, hence differ from corresponding particulars in the Treasurer's Public Accounts. In the period reviewed amounts omitted from the Consolidated Revenue Fund were small until involving net payments of £205,452 in 1947-48, £2,170,010 in 1948-49 and £4,850,363 in 1949-50. Such amounts are fully reflected in the income and expenditure accounts shown for the Business Undertakings, though unpaid by them by reason of unprofitable working.

No. 5.—State Taxation Collections, 1936–37 to 1949–50.

Uniform Taxation on Incomes has been levied since 1st July, 1942 (on income derived 1941-42), and on *admissions to entertainments* from 1st October, 1942. Under the system, taxes at uniform rates throughout Australia are levied by the Commonwealth in place of the separate taxes formerly levied at various rates by both Commonwealth and States on income and by the States on admissions to entertainments. The States are reimbursed by the Commonwealth for suspension of the taxes.

Amounts received annually by New South Wales under the system since 1942-43 consist of (*a*) arrears of State Income Tax collected, and (*b*) Commonwealth Reimbursement Grants, as shown in the first and last columns, respectively, of the table below.

* Comprises Social Services Contribution and Income Tax.

No. 7.—Tax Payable on Incomes Derived by Individuals resident in N.S.W. in 1950–51.

Tax on income of individuals is levied by the Commonwealth, a single levy "Income Tax and Social Services Contribution" on income derived in 1950–51 replacing the separate levies imposed for these purposes in the preceding five years. In the following examples, illustrating the incidence of the tax on 1950–51 income, concessions have been allowed for the dependants indicated, but no allowance has been made for other concessions such as medical expenses, life assurance premiums, etc.

No. 8.—Road and Traffic Funds—Receipts and Disbursements, 1943–44 to 1949–50.

Receipts by the State from the taxation and registration of road transport vehicles, licensing of drivers, etc., are paid into special funds for road and traffic purposes as shown below. Disbursements on specified services represent actual payments during each year; payments to road making authorities consist almost entirely of transfers to the Main Roads Funds of which particulars are shown in Table 9.

† Face Value of Securities converted at rate of $4·8665 to £1.

‡ Cash balance in fund at 30th June, 1950, amounted to £2,631,958.

In terms of the Financial Agreement, contributions are paid annually to the National Debt Sinking Fund in respect of New South Wales debt, as follows:—

1. For 58 years from 1st July, 1928, on net debt outstanding at 30th June, 1927—(*a*) 2s. 6d. per cent. by Commonwealth. (*b*) 5s. per cent. by State.
2. For 53 years on new loans raised after 30th June, 1927 (except for revenue deficits)—5s. per cent. each by Commonwealth and State.

Upon agreement that a loan expended on wasting assets should be redeemed within a shorter period, the State's contribution is increased to provide for redemption within the period fixed, allowing for accumulation at 4½ per cent. compounded.

3. On loans raised to meet a revenue deficit accruing after 30th June, 1927—(*a*) Special deficit loans incurred in depression, 5s. per cent. each by Commonwealth and State, until 30th June, 1944, thereafter for 39 years 5s. per cent. by Commonwealth and 15s. per cent. by State.
(*b*) On other deficit loans, at least 4 per cent., payable by the State, to be accumulated at 4½ per cent. per annum, compounded.
4. Interest on cancelled securities at the rate of 4½ per cent.

Additional contributions are paid by the State to recoup amounts appropriated from the Sinking Fund for discounts on conversions since November, 1936. The additional contributions are spread over the currency of the conversion loans, and the first payment was made in 1938-39.

No. 23.—Loans Guaranteed by State, raised by Corporate and Other Bodies, 30th June, 1950.

In addition to liability for its own loans, the State has a contingent liability under guarantees for the repayment of capital raised by certain corporate authorities, institutions and bodies engaged generally in the promotion of public welfare and development.

* Since January, 1949, technical changes by certain banks in method of compilation have had the effect of reducing non-interest bearing deposits and advances by like amounts. The amounts in months of change were £5,812,000 in January and £668,000 in July, 1949. † Statistics of the Commonwealth Bank comprise the General Banking Division and Rural Credits, Mortgage, and Industrial Finance Departments; comparable figures are not available prior to January, 1949.

No. 6.—Trading Banks—Deposits, etc., in Australia, 1939 to 1950.
(Averages of Weekly Figures.)

This table, with Table 7, showing particulars of principal assets, relates to all trading banks transacting business in Australia. There were eighteen such banks in June, 1950, as listed in Tables 3 and 8, including one in voluntary liquidation and process of amalgamation with another bank. Four of the banks do not operate in New South Wales.

* Not available. † Since January, 1949, technical changes by certain banks in method of compilation have had the effect of reducing non-interest bearing deposits and advances by like amounts (the amounts in months of change were £9,017,000 in January and £2,626,000 in July, 1949). ‡ Comprises General Banking Division and Rural Credits, Mortgage and Industrial Finance Departments. Comparable figures are not available prior to September, 1945. § In the Nine Trading Banks, the increase after June, 1947, consists mainly of short-term loans from the Central Bank.

* Amounts of clearings shown are the recorded totals less Treasury Bill transactions. † The index is based upon the amount of clearings as adjusted to eliminate the effects of bank amalgamations and Treasury Bills and other special transactions on account of governments. The index shown for each month is the average of ratios for that month and the two preceding months, obtained by relating the amount of clearings for each month to the average of the clearings for the corresponding month in the base period 1926-1930. This average is represented by 100 each month.

No. 31.—Yields on Commonwealth Government Securities in Australia, 1932 to 1950.

Yields quoted below were calculated by the Commonwealth Bank of Australia. Those for the years 1932 to 1941 relate to Commonwealth securities issued prior to 1st January, 1940. Interest on these is subject to Commonwealth income tax, but the rates of tax may not exceed those in force in 1930–31.

For 1942 and later years the yields relate to securities issued after 1st January, 1940. Interest thereon is subject without limitation to Commonwealth income tax at current rates, as imposed on each year's income.

Interest on Commonwealth securities was exempt from State income taxes but this concession became ineffective in respect of interest accruing after 30th June, 1941, due to the discontinuance of State taxes on the introduction of the Commonwealth Uniform Tax plan. As a compensating benefit a rebate of tax is allowed equal to 2s. per £1 of interest from Commonwealth securities.

No. 32.—Stock Exchange Index (Sydney) 1938–39 to 1949–50*.

This index relates to ordinary shares of the principal companies (excluding banking companies) listed on the Sydney Stock Exchange whose business is conducted wholly or largely in New South Wales. The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all shares included in the groups with addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares issued, etc.

No. 43.—General Insurance—Business Transacted in New South Wales, 1949–50.

Definitions.—These data are selected items of statistics conforming substantially to the following definitions and are not construable as a "profit and loss" statement or "revenue account." (*a*) Premiums represent the full amount receivable in respect of policies issued or renewed in the year, less returns, rebates and bonuses paid or credited to policy holders in the year. They are not adjusted for premiums unearned at the end of the year, consequently the amounts shown differ from earned "premium income" appropriate to the year. When figures are increasing as in recent years, premiums receivable (as shown) are greater than "earned premium income" appropriate to the year; the converse applies when figures are declining. (*b*) Claims include provisions for outstanding claims and represent claims incurred in the year. (*c*) Other expenditures mainly represent payments in the year.

Section III.—LOCAL GOVERNMENT.

LOCAL GOVERNMENT—EXPLANATORY NOTE.

The City of Sydney was regulated by the Sydney Corporation Act until brought under the provisions of the Local Government Act on 1st January, 1949, when the City boundaries were extended to incorporate eight former suburban municipalities.

Local Governing Bodies in New South Wales comprise Municipal, Shire and County Councils which, with the exception of the Sydney County Council, are regulated by the Local Government Act, 1919, as amended.

Statistics herein refer, with minor exceptions, to 1948 and earlier years. The nature of local government activities is indicated by the statement of aggregate revenue of councils in Table 6, and the details of " Ordinary Services " revenue and expenditure in Tables 10 and 11. Functions of local government embraced by the term " Ordinary Services " are those which come within the scope of the City Fund of the Municipal Council of Sydney and the general funds of the councils under the Local Government Act, including special and local funds relating to works and services of a character similar to those covered by the general funds.

The revenue and expenditure of trading undertakings (*i.e.*, electricity, gas, abattoirs, ice works, water and sewerage) are on a " profit and loss " basis, as shown in the prescribed form of accounts prepared by councils.

Particulars of Ordinary Services expenditure as shown in the summary tables are not presented in the same form as in the statements of revenue accounts prepared by councils under the Local Government Act. The accounts of these councils are composite in character and show in combination expenditure from both revenue and loans. In the summary tables herein expenditure from each source is shown separately—expenditure from revenue in Tables 8 to 12, and expenditure from loans in Tables 14 and 15. By such means particulars of councils under the Local Government Act are shown on the same basis as those of the City of Sydney, and in a form which is more commonly used by public authorities.

The activities of individual councils are shown in the following tables, *viz.*—

(a) *City of Sydney* in Summary Tables 1 to 19.

(b) *Municipalities and Shires under the Local Government Act* in Tables 20 to 58. Ordinary Services expenditure as appearing in Tables 23 and 46 is in the same form as in council's accounts, and differs therefore from totals shown in the summary tables which have been adjusted as described above. Expenditure on such services as parks, baths, markets and property, which has been capitalised is not included in these tables, but is shown in total in Tables 24 and 47.

(c) *County Councils* in Tables 59 to 67.

Additional information for the year 1949-50 is shown in Tables 68 to 76, relating to two large semi-governmental undertakings, *viz.*, Metropolitan Water, Sewerage and Drainage Board and the Hunter District Water Board.

No. 2.—Municipalities and Shires—Valuations of Ratable Property, 1921 to 1950.

The *Unimproved Capital Value*, as shown below, is the amount which the fee-simple of the land might be expected to realise if offered for sale on such reasonable conditions as a *bona-fide* seller would require, assuming the improvements thereon had not been made.

The *Improved Capital Value* is the amount which the fee-simple of the land, with improvements and buildings thereon, might be expected to realise.

The *Assessed Annual Value* is nine-tenths of the fair average rental of land with improvements thereon.

* Includes contributions to County Councils. † Depreciation charged in Council's accounts is deducted in order to remove from the total expenditure duplication which arises from the inclusion in expenditure of (1) purchase of assets from revenue and depreciation of those assets, and (2) repayment of loans expended on the purchase of assets and depreciation of the assets. The amount of depreciation deducted cannot be apportioned amongst the individual items of expenditure.

* Repayments represent amounts provided each year for the redemption of long term debt from such sources as revenue, proceeds of sale of assets, and repayments of debts owing to councils. They include yearly and half-yearly instalments of principal and credits to sinking fund consisting of appropriations from revenue and interest earnings on sinking fund investments. Repayments from sinking funds and renewal or conversion loans are not included.

* Sinking funds of the City of Sydney and Sydney County Council are large as most of their loans were raised for fixed periods with provision for repayment through sinking funds. They are small for other councils, which borrow usually on terms requiring repayment by yearly or half-yearly instalments.

FACTORY STATISTICS.

SCOPE OF THE STATISTICS AND DEFINITIONS OF TERMS USED.

Scope.—The statistics are compiled annually in respect of—

Number and size of factories; number of persons employed in various categories; ages of persons employed; salaries and wages paid; rated horse-power of engines ordinarily in use and those in reserve or idle; book value of land, buildings, plant and machinery (not capital invested); value of material, containers, repairs and replacements, power, fuel and light (including water and lubricating oil) used; quantities and values of fuel used; value of output; value of production; and in a number of industries, quantity and value of principal materials used and articles produced.

Factory.—For the purposes of the statistics a " factory " is an establishment in which four or more persons are employed, or power (other than manual) is used, in any manufacturing process. The following industries are not included—Farriery, Smallgoods-making, Photography Studios, Laundries, Florists and Seedsmen.

Average Number of Persons Employed.—

(A) *During Period of Operation* represents the aggregate of the average weekly number of employees in each factory—the average being calculated for the period the factory was operating during the year.

(B) *During the Whole Year* represents the aggregate of the average number of employees in each factory—the average being calculated for the period of twelve months.

All persons employed in the manufacturing activities of a factory are counted as factory employees, including operatives, managerial and clerical staff at the factory, working proprietors and " out workers." Persons engaged in selling and distribution, such as salesmen, travellers and carters engaged solely on delivery of manufactured goods are not included.

Rated Horse Power of Engines Installed.—Statistics of power used in factories other than central electricity generating stations relate to the " total rated horse-power " of engines ordinarily in use and of engines in reserve or idle, omitting obsolete engines. In the case of central electricity generating stations the figures refer to the " total rated capacity " of engines and generators installed.

Value of Materials used includes the value, as at the factory, of the materials and stores used, containers, tools replaced, and materials used in repairs to plant. The following are exceptions :—

(*a*) Where factory operations consist of assembling manufactured parts of machines, motor cars, etc., the value of the parts is not included;

(*b*) Where goods in bulk, *e.g.*, tobacco, tea, are made up in packets, the value of the bulk goods is not included.

Value of Fuel, etc., Consumed.—This item includes coal, coke, fuel, oil, tar fuel, gas, wood, etc., and the cost of electric power and light used. For convenience the cost of lubricants and water used are also included under this heading.

Value of Output is the value of the goods manufactured or work done. It is based generally on the selling value at the factory, exclusive of cost of delivery and of excise duty (if any).

Value of Production is the value added to materials by the processes of manufacture. It is calculated by deducting from the value of output the value of materials and fuel used (as defined above).

[*Note.*—Materials, fuel, output and production are valued as at the factory.]

THE FORM AND INSTRUCTIONS.

A copy of the front of the Form issued to proprietors of factories is reprinted on the following page. Provision is made on the back of the form for the collection of particulars of materials used and articles produced.

A copy of the instructions issued for the guidance of those responsible for furnishing the information is also shown.

NOTE.—Statistics of factories and works published in this Part are not a complete record of either the income or expenditure of the undertakings concerned, and are not intended to show their financial position collectively or individually.

INSTRUCTIONS TO PERSONS FILLING IN FACTORY RETURNS.

General.

1. *These returns are collected under the authority of the Census Act,* 1901, *and any person concerned who refuses or neglects to answer any of the questions on the return is liable to a penalty of £20. An extension of time will not be granted unless it can be shown that it is impracticable to supply the return within the time allowed.*

2. *Your returns will be regarded as strictly confidential. The information given in these forms is used only for statistical purposes to arrive at aggregates for each kind of industry. The contents of individual returns will not be disclosed in any way, and will not be seen by any person other than employees of this or the Commonwealth Bureau of Statistics.*

3. (*a*) *Several Industries in One Establishment.*—In large establishments where two or more industries are carried on, separate forms will be supplied, which should, if practicable, be filled in for each industry. The particulars relating to the whole establishment should be allocated, as nearly as possible, to each industry.

(*b*) *Several Branches of one Establishment in Different Locations.*—If practicable, a separate return should be completed in respect of each address. Where this is not possible a composite return covering the operation of all branches will be accepted providing the average weekly employment is shown separately for each location.

4. The line " Nature of Work Done " should be used for a brief description of the main operations or processes carried out, *e.g.*, Brickmaking, Shirtmaking, Motor Repairing, Bread Baking, Sawmilling, etc.

5. Where a manufacturing business is carried on in connection with a wholesale or retail trading business, the return must be restricted to the details of the *manufacturing branch only*. That portion of the premises used for manufacturing purposes should be separately valued and shown under Part C. *Particulars concerning Salesmen, Travellers, Collectors, and Retailing Storemen must NOT be included with persons employed in the factory, or in salaries and wages paid.*

Explanation of Items Required.

6. *Period Worked.*—The time the establishment was working during the year is to be given in calendar months, holidays during working period being also included.

7. *Average Weekly Number of Persons Employed.*—This means the average weekly during the period of operation. For example, for an establishment working the whole year the average will be the sum of the *total* employees for each week of the year divided by 52; the average for an establishment working three months will be the sum of the weekly totals divided by 13, and similarly with other periods. The total of the average numbers employed must be distributed under the various groups as shown.

Note.—*Carters* (on wages—not contractors) employed in bringing material for manufacture should be included, but not those engaged entirely in the delivery of manufactured goods, as the value of output of such goods is the selling value " at works," excluding all delivery costs or charges. If the carter's work be divided in this respect his time and wages should be apportioned accordingly.

8. *Salaries and Wages Paid.*—

Working Proprietors.—No amount of remuneration is required to be shown.

Other Employees.—The total amounts of salaries or wages paid to all employees during the year are required to be given.

Pay Roll Tax.—The amount paid as PAY ROLL TAX must not be included as salaries and wages paid.

9. *Engines Employed to Drive Machinery.*—Number and total rated horse-power are required separately for Engines ordinarily in use and for engines in reserve or idle (*i.e.*, in use occasionally, as during periods of breakdown to own engines or power supply). Obsolete engines must be omitted. If the same power is used in the one establishment for more than one " industry " the horse-power of the engines should be allocated, if practicable, as indicated in 3 above.

10. *Value of Land and Buildings used for Works and Factory Purposes.*—Where the Land, Buildings and Fixtures are the property of the occupier, the values stated should be the depreciated values or book values less any depreciation reserve existing in respect of them. If the premises are rented, state the amount of rent payable, exclusive of rates and taxes.

11. *Value of Machinery and Plant.*—This should include the value of all machinery, implements and tools used; also plant for the conveyance of raw materials (such as trams, carts, horses, etc., and casks in the case of a brewery). In brickyards, potteries, and glassworks the value of the kiln should be included under this head, and not as a building. The values stated should be the depreciated values, or book values less any depreciation reserve existing in respect of them. Where rent is paid for machinery the amount payable must be stated.

12. *Cost of Power, Fuel and Light Used.*—Care should be exercised to see that the costs are not duplicated in any of the other items and that full particulars of quantities asked for are given for each kind of fuel. Coal used in the manufacture of coke, and gas coke used in Steel Furnaces, and acetylene gas and oxygen should not be included here but shown as a raw material opposite Item (13).

13. *Materials Used, etc.*—Item 13—The value quoted should be the cost landed at the factory of all materials actually used during the year. All subsidies, rebates, etc., paid to the producer of the raw materials should be excluded.

Making-up or Treating Customers' Materials.—Include in Item 13, the value at cost only of maker's own materials, such as trimmings, cottons, etc. (dyes, etc., in dyeing) used, and in Part E, Item 15B, the amount charged to customers for making-up or treating their materials.

Repair Work of any Kind.—The value at cost of all materials used in repairing should be included in Item 13, while the amount charged for making repairs should be shown in Part E, Item 15B.

Other Costs of Production.—Costs such as insurance, taxation, etc., must not be included anywhere on the form. This is a return of selected items of factory statistics and it is not intended to embrace all items of cost nor to reveal profits or losses. Only those costs specifically mentioned on the form are to be shown thereon.

Assembling the Manufactured Parts of Machines, Motor Cars, etc.—Where manufacturing operations consist only or partly of assembling the manufactured parts of machines, motor cars, etc., the value of the parts should not be included in the cost of materials used, nor in the value of output. The value of output (Part E, Item 15B) should include the actual labour cost of assembling the parts, cost of fuel and power used, any additional expenses of assembly, and profit made on such work.

Finished Goods Purchased for Re-sale.—The value of finished goods purchased for re-sale without treatment, must not be included anywhere.

14. *Value of Output.*—Item 15A.—The value here given should be the selling value at factory to customers of all goods made or processed during the year (including by-products) after deducting all delivery costs and charges and after adding any bounty or price stabilization subsidy received by the manufacturer on the finished product. That portion of the goods manufactured and remaining unsold at the end of the year should be valued at current rates.

Item 15B.—The value here given should be the amount charged to customers for other work done, such as repairs, renovations and alterations and work done on commission.

Goods in Process of Manufacture.—The value of goods in process at the end of the year just completed must also be included in the value of output (Item 15B). Similarly, the value of goods in process at the beginning of the same year must be added to the " cost of materials " used (Item 13).

Costs of Installation, etc.—Where the selling price of manufactured goods includes installing or fixing (shop and window fittings, tiles, fibrous plaster sheets, etc.) the charges for transport, installation, erection or fixing of such goods must be deducted in valuing output in Item 15A. Employees engaged in such work, and their wages, must also be excluded from Part A.

15. *Excise and Sales Tax.*—Must not be included in the value of output or in the particulars given of any article manufactured.

16. *Bounty or Subsidy.*—The amount received as bounty or subsidy (of any kind) on the production of any article must be included in the " value " of goods manufactured (Item 15A).

Directions Relating to Special Industries.

Bakeries.—Carters and all persons engaged solely in delivery and in selling the commodities produced should be excluded. The output value should be the selling value of bread, etc., made, less all delivery and selling costs.

Brick, Pottery and Tile Works.—The value of materials used shown in Part D must include wages of pitmen and all other costs incidental to obtaining clay and delivering at the kiln. Such employees and the wages paid to them should, therefore, not be included in Part A. *The value of the kiln must be included as part of your plant and not as a building.*

Cold Storage.—The value of the commodities placed in the cold store should not be included in the cost of materials used (Part D) or in the value of the output (Part E). The amount to be shown in Part E, Item 15B, should include the actual labour cost, the cost of fuel and power used, any additional expenses of storing, and profit made on such work.

Food-packing, Tobacco-cutting and Packing, Tea-blending and Packing, Bottling and Grading Establishments.—In these and other similar establishments where imported or other goods in bulk are made up in packets, but no actual manufacturing is done, only the value added to the material by the operation should be shown in Part E, Item 15B. This value may be ascertained by subtracting the cost of materials used from the wholesale selling value of the finished goods.

Newspapers, Magazines, and Journals.—If the newspaper, magazine, or journal is printed by the proprietors, only the persons employed in the printing should be included in the return. The value of the output is not required, but all other particulars must be furnished. In other cases, where the newspaper or journal is printed for the proprietors by another person, it should be treated in the return of the printer as ordinary job printing.

No. 3.—Number of Factories in each Class of Industry, 1938-39 and 1944-45 to 1949-50.

NOTE.—Materials in above Table include fuel, and wages include salaries but exclude drawings of working proprietors. The balance is, in general, the proportion which accrues to the proprietor for general purposes, including depreciation, taxation, Workers' Compensation, etc., and profit, but in some cases, *e.g.*, rubber, the total output represents only the value at which products are passed to the sales department.

* Includes area sown for green food. In 1927-28 and previous years all areas fed-off were included in this column. In later years areas fed-off with value less than the value on the farm of five bushels of grain at current price were considered to have failed entirely. In such cases the acreage was allocated to grain or hay according to the purpose for which sown.

† Flour has been expressed as its equivalent in wheat (1 ton of flour=48 bushels of wheat prior to 1950–51, and 46·3 bushels in 1950–51).

† Prices based on averages of heavy and medium weights.

NOTE.—The above prices for sheep represent the averages for all sheep, whether shorn or woolly; but as a general rule the fat sheep at market in January and February are shorn; during March and April they have growing fleece; from May to August they are woolly and in September to December they comprise both shorn and woolly. Relatively few crossbred wethers and ewes are marketed at Homebush.

Section III.—METEOROLOGY.

Time Ball.—The Time Ball at the Sydney Observatory is dropped every day at 1 p.m. Standard Time. The Time Ball at Newcastle is controlled by signals from the Sydney Observatory.

Standard Time.—The mean time of the 150th meridian of longitude (or 10 hours) east of Greenwich, England, is the Standard Time throughout New South Wales, except for certain purposes in the Municipal District of Broken Hill and the Electorate of Sturt, for which the mean time of the 135th meridian of east longitude is adopted.

Position of Sydney Observatory.—Latitude, 33° 51′ 41·1″ south; longitude, 151° 12′ 23·10″ east; altitude, 138 feet.

The Tables in this Section have been compiled from particulars furnished by the Commonwealth Meteorologist.

NOTE.—The above tables are based upon the records of the Commonwealth Meteorologist. The divisions correspond approximately with the statistical divisions shown on the map in the frontispiece of the Official Year Book of New South Wales and listed in tables in other parts of this volume. Where divisions in the above table are subdivided into two sections the letters N, S, E, or W indicate the northern, southern, eastern or western portion of the division concerned.

PART IV.--TRADE, TRANSPORT AND COMMUNICATION.

Section I.—OVERSEA TRADE.

Statistics of the Oversea Trade of Australia are compiled by the Commonwealth Bureau of Census and Statistics from records of the Department of Trade and Customs; details are published annually in the Commonwealth Bulletin of Oversea Trade and Customs and Excise Revenue.

Particulars of the Oversea Trade of New South Wales published in this section of the Statistical Register were compiled from tabulations supplied by the Commonwealth Bureau of Census and Statistics.

Basis of Valuation.—The values of oversea imports and exports, as shown in this issue of the Statistical Register, are expressed in Australian currency free on board at port of shipment.

Wartime Trade.—Lend-lease imports and exports for the Forces in the Pacific Area were included in statistics of Oversea Trade during the war, but supplies imported or exported direct to their nationals by visiting Allied Forces were not included. Customs entries for lend-lease goods were frequently delayed for some months and in such cases the imports were recorded in the month in which entry was passed.

Records are not available regarding some lend-lease imports and exports of war materials on Government account for which entries were not passed in the normal way. The Commonwealth Statistician has estimated that the value (in Australian currency f.o.b.) of this unrecorded trade of Australia (all States) was as follows :—

Imports £18,350,000 in 1941–42, nil in later years. Exports (non-foodstuffs) £12,645,000 in 1941–42, £2,500,000 in 1942–43, £10,000,000 in 1943–44 and £2,000,000 in 1944–45. These amounts cannot be apportioned among the various States and no estimate of the amount of New South Wales trade unrecorded is included in the statistics published herein.

Section IV.—SHIPPING.

The Shipping Statistics of New South Wales contained in Tables 1 to 20 relate generally to vessels engaged in normal trade, that is, the carriage of part or full cargoes for civil purposes. They are exclusive of vessels trading solely between ports of New South Wales, war vessels, cable-laying vessels, yachts, and, during the war period, vessels engaged exclusively in the transport of troops, war equipment and supplies. Vessels are entered at the first port of call in New South Wales and cleared at the port from which final departure is taken. The repeated voyages of vessels are included and net tonnage is shown. In Tables 21 and 22 particulars are shown regarding all vessels (excluding warships) which entered the principal ports of New South Wales, *viz.*: oversea, interstate and intrastate vessels, including vessels engaged exclusively in the transport of troops, war equipment and supplies.

Gross tonnage of a vessel is the internal cubical capacity expressed as tons; one hundred cubic feet equals one ton.

Net tonnage of a vessel is gross tonnage as defined above less spaces which cannot be utilised for carriage of cargo and passengers, *e.g.*, engines and crew's quarters.

No. 6.—Commonwealth Motor Vehicle Survey in N.S.W.—Type of Vehicle and Usage, 1947-48.

(Excluding Motor Cycles and Trailers).

NOTE.—Tables 6 to 11 inclusive were compiled from the results of a special Survey of Motor Vehicles in Australia, carried out by the Commonwealth Statistician. The figures relate to motor vehicles (except motor cycles and trailers) whose registrations were renewed in the year ended 30th June, 1948, plus new vehicles registered less registrations cancelled in that year. The totals do not relate to the number of vehicles on the register at any specified date, but represent the number of vehicles on the road during the year.

Motor Vehicle Tax.—At 30th June, 1952, the annual rates of tax on pneumatic-tyred motor vehicles, were as follows:—

Car	approx. 3s. 4d. per half cwt.	Motor Cycle, Solo	£1 7s. 0d.
Omnibus	approx. 5s. 1d. ,, ,,	Motor Cycle, with side-car or box ...	£2 7s. 6d.

In the case of other vehicles (mainly lorries), the rate of tax increases with the unladen weight; e.g, the annual tax is £6 5s. on a vehicle of 20 cwt., £17 on one of 40 cwt., and £36 15s. on one of 60 cwt. Double the ordinary rates of tax are payable in respect of these vehicles. Primary producers' motor lorries, etc., are taxed at 90 per cent. of the ordnary rates.

The motor registration fee is £1 5s. per annum and **driver's licence fee**, 15s. per annum.

Notes.

1. *Boundaries of Metropolis.*—Boundaries of the Metropolis have been changed by the addition of the following local government areas:—

(*a*) From the date of the 1911 Census—
Shire of Ku-ring-gai (incorporated as a municipality in 1927).

(*b*) From 1st January, 1929—
Municipalities of Auburn, Bankstown, Granville, Lidcombe, and Parramatta.

(*c*) From 1st January, 1933—
Municipalities of Dundas, Ermington and Rydalmere, and Holroyd (Pitt and Merrylands Wards only).

Unless otherwise stated, the word "metropolis" refers to the City of Sydney and suburbs as delimited for statistical purposes from 1st January, 1933.

2. *Aboriginals.*—Full-blood aboriginals have been excluded from all population statistics and have been excluded from statistics of births and deaths since 1st January, 1933.

3. *Population Statistics, 1939–1947.*—Australian defence personnel, irrespective of their location, are included in the population of the State in which they enlisted; statistics of migration relate to civilians only.

In view of the uncertainty of wartime records, from 1st July, 1943, to 30th June, 1947, recorded interstate arrivals and departures were disregarded for purposes of population estimates. It was assumed that interstate net migration was nil or negligible.

4. *Births and Deaths by Usual Residence.*—Since the beginning of 1927, births and deaths for any subdivision of the State have been tabulated according to usual residence; consequently these figures for any municipality, shire or division cannot be compared with those for years prior to 1927. Marriages have always been tabulated according to the place of celebration.

5. *Stillbirths.*—For purposes of record, stillbirths are registered as deaths as well as births, but in the tables in this Part stillbirths are not included in the statistics of deaths.

6. *Death Statistics, 1939–1947.*—(*a*) The death statistics (as recorded in Section II) for the years 1939 to 1947 were compiled on the following basis:—

1939 to 1941.—Australian defence personnel (irrespective of State of enlistment) who died in New South Wales viz., 256 males, were included.

New South Wales defence personnel who died outside the State were excluded.

1942 to 30th June, 1947.— All defence personnel and other non-civilians were excluded.

(*b*) Deaths of New South Wales personnel in defence forces in or out of Australia, so far as recorded, were as follows:

Year.	Males.	Females.	Year.	Males.	Females.
1939	8	...	1944	2,047	12

NOTE.—The figures quoted for 1841 and subsequent years represent the population of New South Wales within its boundaries after the separation of Victoria and Queensland. Victoria was separated from New South Wales on the 1st July, 1851, and Queensland on the 10th December, 1859. The Australian Capital Territory was transferred to the Commonwealth on 1st January, 1911.

* The population of the Australian Capital Territory is excluded, viz., 1911, 992 males, 722 females, 1,714 persons; 1921, 1,567 males, 1,005 females, 2,572 persons; 1933, 4,805 males, 4,142 females, 8,947 persons; and 1947, 9,092 males, 7,813 females, 16,905 persons. ‡ From 26th October, 1821. ¶ Includes unoccupied dwellings. § Not available. †† Includes 509 nomadic half-caste aboriginals.

* Prior to 1st July, 1948, migrants were classified on a joint basis as to nationality and race. From 1st July, 1948, as shown in this table, the classification as to nationality is independent of race and is as stated on the passports of migrants. Tabulations on the two bases are not directly comparable. Net oversea migration for period 1944 to June, 1948, on the former basis, is shown in Table 16. Net migration is excess of total arrivals over total departures.

*Under the Public Instruction Act of 1880, it is provided that the teaching in public schools must be strictly non-sectarian. Secular instruction imparted by teachers is defined as including "general religious teaching as distinguished from dogmatical or polemical theology." Religious instruction may be given by authorised teachers of any religious persuasion to children of their religion for a maximum period of an hour each school day, children of different persuasions to be instructed on different days.

Subsidised Schools.—Subsidies are granted in the case of children resident in country districts so far removed from any public school that attendance is impracticable. Where a private teacher, approved by the Minister, is engaged by one or more families, subsidy is paid to the teacher at a rate based on average monthly attendance; in 1952 the rates ranged from £46 17s 6d. to £137 10s. 0d. per annum in the eastern section of the State, and from £51 11s. 3d. to £150 in the western section.

NOTE.—*Private Schools.* Any school, other than a State school, attended by children of statutory school age must be certified by the Minister for Education as efficient (taking into account the standard of instruction, qualifications of the teachers, suitability of school premises and general conduct of the school). Private secondary schools must be registered for the education of pupils holding State bursaries under the Bursary Endowment Act. Certified schools at private charitable institutions are included in statistics of private schools; business schools, ecclesiastical seminaries and uncertified nursery and kindergarten schools are not included.

Section III — BUILDING.

NOTES.

1. The statistics given in this section relate to building structures and exclude other types of construction. Repairs, renovations, and minor alterations to buildings, and most buildings on rural holdings are excluded.

2. Statistics of building throughout the State by Commonwealth, State, and local governmental authorities have been compiled since July, 1939. Statistics of private building approved in 1946 and earlier years were derived from returns of permits to build issued by the local government councils of the Metropolis of Sydney, 129 country towns (including 11 in the Balance of Cumberland) and 7 extra metropolitan shires; for 1947 and later years, returns of permits to build have been obtained from all local councils in the State. Additional particulars relating to buildings actually commenced and completed are collected from builders on contract and owner-builders.

3. "Value" represents the estimated cost of the building when completed (exclusive of the land).

4. Building is classified as "government" or "private" according to ownership. Many buildings classified as "government" are constructed by private builders on contract to governmental authorities. Buildings for which finance and materials are "sponsored" by governmental authorities to assist building for private ownership are not classified as "government."

5. "Value of Building Approved" is (i) for private building — the value of permits issued by local government councils; and (ii) for government building — the value of contracts let or work commenced and day labour jobs authorised by governmental authorities.

6. "Number of Houses and Flats Approved" is (i) for private buildings — the number for which local government council permits were issued; and (ii) for government buildings — the number included in contracts let or day labour jobs authorised by governmental authorities.

Section V. PRICES, WAGES AND EMPLOYMENT.

PRICES.

No. 1.—Retail Price Index Numbers " C " Series—All Items and Component Groups, Quarterly, 1928 to 1952.

Base: Weighted Average for Six Capital Cities in 1923-27 = 1,000.

NOTE—1. The index numbers are compiled by the Commonwealth Statistician and are described fully in the Commonwealth "Official Year Book" and "Labour Report." They are designed to measure the extent of changes in prices of goods and services within a regimen which is representative of a high proportion of the expenditure of wage-earner households.

2. The *group* index numbers cannot be compared with each other, as, for example, to compare the relative cost of housing and of food and groceries, since the cost *in each group* in 1923-27 (weighted average, six capital cities) is made equal to 1,000.

WAGES.

No. 5.—Basic Wages—Sydney—1939 to 1953.

The wage-regulating tribunals exercising jurisdiction under State or Federal law base their determinations upon "living" or "basic" wages which represent the minimum rates which may be prescribed for adult unskilled workers. The determination of living wages for men and women in industries under State jurisdiction was a function of the Industrial Commission of New South Wales from 1926 to 1937. In October, 1937, the basic wage of the Commonwealth Court of Conciliation and Arbitration was adopted.

In the Commonwealth jurisdiction, basic wages are determined by the Full Bench of the Commonwealth Court of Conciliation and Arbitration. Usually, the rates are subject to automatic adjustment at quarterly intervals according to the "Court Series" of Retail Price Index numbers, which corresponds with the All Items ("C") Series index compiled by the Commonwealth Statistician for the capital cities and certain towns in Australia.

No. 6.—Average Nominal Weekly Wage Rates and Average Weekly Standard Working Hours, New South Wales, 1939 to 1952.

Compiled by Commonwealth Statistician. The wages data are based upon the minimum amounts payable for a full week's work, calculated on the minimum hourly, daily or weekly rates prescribed by industrial awards and agreements or the predominant rates for a few occupations not subject thereto. The rates relate to the Metropolitan Area (Sydney) except in industries such as the mining, agricultural and pastoral industries.

Minimum wage rates in certain occupations are shown in Table 8 and an arithmetic mean of these and other occupations is shown according to industrial groupings in Table 7. In computing the average for all industries combined (Table 6) the average for each group is weighted according to the number of workers in that group.

The average weekly standard working hours are calculated by similar method.

The data are in course of revision to meet changes in industrial structure. The amounts shown should not be regarded as actual current averages but as indexes expressed in money and hour terms.

No. 9.—Wages and Salaries Paid and Average Earnings per Male Unit, N.S.W.,* 1945–46 to 1952–53.

(Revised Series).

Compiled by the Commonwealth Statistician from employment and salaries and wages recorded on Pay Roll Tax Returns (which cover approximately 80 per cent. of total private and government employment) and from estimates of the unrecorded balance; pay of members of the armed forces is not included. The figures are not seasonally adjusted.

‡ Total wages divided by total civil employment expressed in male units. Male units equal the number of males plus a proportion of females, based on the approximate ratio of average female earnings to average male earnings.

EMPLOYMENT.

No. 10.—Industrial Disputes, N.S.W., in Existence during the Year, 1931 to 1951.

Statistics in Tables 10 to 13 are prepared from data collected and tabulated by N.S.W. Department of Labour and Industry and Social Welfare.

They only include workers directly involved in disputes. "Workers involved" is the sum of workers involved in each separate dispute. A dispute is counted as one dispute even if other workers subsequently become parties to it, but where workers cease in sympathy, each sympathy stoppage is counted as a separate dispute. If a dispute causes closure of a mine, all employees of the mine are deemed to be involved, but if mine work continues, only those ceasing work are counted as involved.

In calculating " working days lost " the days on which work ordinarily would be performed are taken into account, without allowance for intermittency of work from causes other than disputes, and for absenteeism. Hence the working days lost (in mining disputes in particular) tend to be overstated.

No. 16.—Workers' Compensation Act, N.S.W.—Number of Compensatable Cases, 1945–46 to 1950–51.

(Excludes cases of less than three days incapacity.)

The Act applies widely in providing for compulsory insurance and the compensation of workers in respect of injuries arising out of or in course of employment or the daily or other periodic journey between home and the place of employment. The principal classes of workers not covered by the Act are Commonwealth Government employees, the police, outworkers, casuals employed for one period only of five or less days other than for the purpose of the employer's business, employees whose remuneration (exclusive of overtime, bonuses and special allowances) exceeds £1,250 (£750 prior to 20th December, 1948), silica dust cases other than in coal mining, and workers compensatable under the Workmen's Compensation (Broken Hill) Act.

* See note above Table 16. Compensation actually paid in the years as shown above cannot be related to the number of cases arising in the year (shown in Table 16) as in many cases payments overlap from year to year and in some continue for a number of years. The amounts shown do not represent total payments by insurers; they exclude payments in respect of cases under three days incapacity (compensatable since 20th December, 1948), alternative benefits (e.g., by damages at Common Law), medical costs paid in numerous instances of minor injury which did not result in absence from work, and expenses of settlement and management.

No. 20.—Workmen's Compensation (Broken Hill) Act—Beneficiaries and Compensation Payments, 1946-47 to 1950–51.

This Act provides for compensation for Broken Hill miners who contract pneumoconiosis or tuberculosis. Compensation for workers who entered employment in the mines after 31st December, 1920, is met wholly from mine-owners' contributions; other cases are a charge on the Broken Hill Pneumoconiosis-Tuberculosis Fund, to which mine-owners and the Government of New South Wales contribute equally.
